Greg Johnson prefers the deranged hedgehog theory concerning the Unusual Anglic Wheat Circle Phenomena, while Bob Gonsalves suspects that, perhaps, it is just an alien intelligence, possibly of terrestrial origin.

On the whole, however, Greg and Bob have little time to contemplate such weighty matters. This is because they are driven

by a strange compulsion to translate into computer game format the transmissions they receive on a daily basis from outer space. When asked to comment on this, all Greg would say is "We are not aliens," to which Bob added, "We are from New Jersey, yes."
